2013 AT A GLANCE

692 yachts over 80 feet under construction worldwide, down **5.2%**

14 projects over **100 meters** LOA sets new record

Most yacht gross tonnage under construction since **2007**

3.9% increase in yachts ordered above 150 feet LOA

44% increase in yachts ordered above **250 feet** LOA

Italian yard production down by **14.2%**

Dutch yard production up **8.2%**

ShowBoats International magazine, part of Boat International Media, is North America's premier luxury yacht publication. Its select readership includes high-net-worth superyacht owners, builders, brokers, captains, and designers.

By Raphael Montigneaux and the editors of *ShowBoats International* magazine

Although 5.2 percent fewer yachts are listed as “under construction” in this year’s Global Order Book—692 compared to 728 yachts last year—the orders confirm a future full of activity at most yards, especially for pedigree yards and those building yachts over 40 meters and custom builds.

The world map of builders has remained largely the same with Italy leading and still running away with top honors in the market with 272 projects. The Netherlands firmly holds onto the second spot with a significant increase (15.85%) in the total length of vessels under construction (from 10,085 to 11,684 feet) as well as an increase (8.2%) in overall number of projects (from 61 to 66). Taiwan creeps past Germany this year, moving into sixth place from its seventh position last year, and the United Arab Emirates enters the top ten at number nine.

The trend of orders for larger yachts has continued from last year, although there has been a 30% drop in open-style yacht orders from 63 in 2012 to 44 in 2013. The rest of the yacht types are staying within the same range, proving again that yachts consuming a lot of fuel are less in vogue.

As we predicted in years past, the future continues to lean towards fully custom yachts, mostly coming from historically proven yards that give a perceived assurance of quality and a potential boost in lasting value for the yacht on the resale market. We have also noted that some of those yards that opened their doors during the height of the market have been surprisingly able to keep their doors open through the downturn

THERE HAS BEEN A 30% DROP IN OPEN-STYLE YACHT ORDERS

by delaying their production schedules and maintaining artificial activity or unofficial slowdowns throughout the last couple of years, although we wonder how long they can continue this trend.

Historically sound yards are recording new orders, giving those yards work until 2015, even 2016 for some. This is the case with most northern European yards, a good example being the renowned Dutch consortium Feadship, which announced no less than 13

Azimut 140

■ NUMBER OF PROJECTS BY LENGTH

yachts in build including seven recently placed orders. In Germany, Lürssen impressed with the fitting out of the gigantic 482-foot *Topaz* in only one year (the largest yacht delivered in 2012) and follows with an even larger project.

A trend for this 2013 Order Book is the inclusion of some enormous yachts; no less than 14 projects over the mythical 100 meters are currently on order—a new record for the industry. Astoundingly, three of those 14 100-meter-plus projects are sailing yachts, and another, a 101-meter *Ed Dubois* sloop, is not included in this Order Book but is expected to sign with a European builder this coming spring.

Even with recording fewer projects in build this year, we note larger yachts under construction throughout the Order Book, with 186 orders over 150 feet this year versus 179 last year, an increase of 3.9%, and 39 orders over 250 feet compared to 27 in 2012, that's

“ASTOUNDINGLY, THREE OF THOSE 14 100-METER-PLUS PROJECTS ARE SAILING YACHTS”

an increase of 44.4%. This has led to a large number of yards now building their next flagships in their range. Such is the case with Lürssen, building the 590-foot *Azzam*, the future largest yacht in the world; *Feadship* with a 333-foot motor yacht; *Nobiskrug* and its secret

■ NUMBER OF PROJECTS BY LENGTH

LENGTH (IN FEET)	2013	2012	2011	2010	2009	2008	2007	2006
80-89	119	178	158	187	286	253	207	216
90-99	94	70	78	89	117	114	109	86

Total	692	728	749	753**	992*	916	777	688

* Does not include 16 builds from Lürssen and Amels not identified by length.
 ** Does not include Amels, which did not specify 10 projects by length.

■ THE RULES & METHODOLOGY

The Global Order Book was established in 1992 by the editors of *ShowBoats International* to provide a body of data, updated annually in a systematic fashion, to show the scope of economic activity within the international luxury yacht industry. Each year, we present a list of yachts 80 feet (24 meters) and longer, on order as of September 1, at shipyards throughout the world.

Every effort is made by the editors to ensure that the Global Order Book data is comprehensive and accurate. We rigorously attempt to survey all the shipyards currently building yachts in the specified size range. Every shipyard receives the same list of rules and, whenever possible, shipyard data is cross-referenced with other industry sources. In many cases, the data is corroborated with personal visits to shipyards. Participation in the Global

Order Book is entirely voluntary and is free of charge. Qualifications for a project to be included in the 2014 Global Order Book are: Each yacht must be 80 feet (24m) or longer to be eligible. In one graph we have isolated custom yacht builders for comparison purposes. Builders such as Amels and Palmer Johnson that build series designs along with truly custom builds are included in the “custom” list due to the extensive customization of these vessels. New projects must be signed and with a minimum 10 percent deposit received by the shipyard by, on, or about Sept. 1, 2013. Speculative (“on spec”) construction may be listed, but only if actual construction, i.e. cutting metal, hull lay-up or tooling, is started by, on, or about the same date.

2014 GOB RANK	COUNTRY	TOTAL (M)	TOTAL (FT)	PROJECTS	AVG. LENGTH (FT)	2013 GOB RANK
1	Italy	10,686	35,059	274	128	1
2	The Netherlands	3,456	11,339	65	174	2
3	Turkey	3,120	10,236	70	146	3
4	USA	2,435	7,989	63	127	4
5	UK	2,081	6,827	71	96	5
6	Taiwan	1,724	5,656	56	101	6
7	Germany	1,457	4,762	16	298	7
8	China	900	2,953	26	114	8
9	UAE	851	2,792	18	155	9
10	Greece	412	1,352	5	270	not ranked

482-foot sailing yacht; Oceanco with a gigantic sailing yacht of 354 feet; Vitters with a 279-foot sailing yacht and the likes of Benetti with a 295-foot motor yacht.

On the other side of the spectrum, we note that the category of smallest yachts, mostly series production, continues to suffer, with only 119 projects recorded this year between 80 and 89 feet, compared to 178 last year, a drop of 33.1%. One country, Italy, has particularly suffered in this corner of the market, losing net 45 hulls this year, including 26 from the Ferretti Group alone. All builders seem to be feeling pain in the 80- to 90-foot range, and with the large number of competitors and the large amount of secondhand yachts available in this size range, the near future continues to look bleak. At some point, however, this will become a seller's market as fewer late-model yachts are available to the growing number of potential yacht enthusiasts in BRIC countries.

We can say that 2012 was an interesting year, though we won't say a good one when

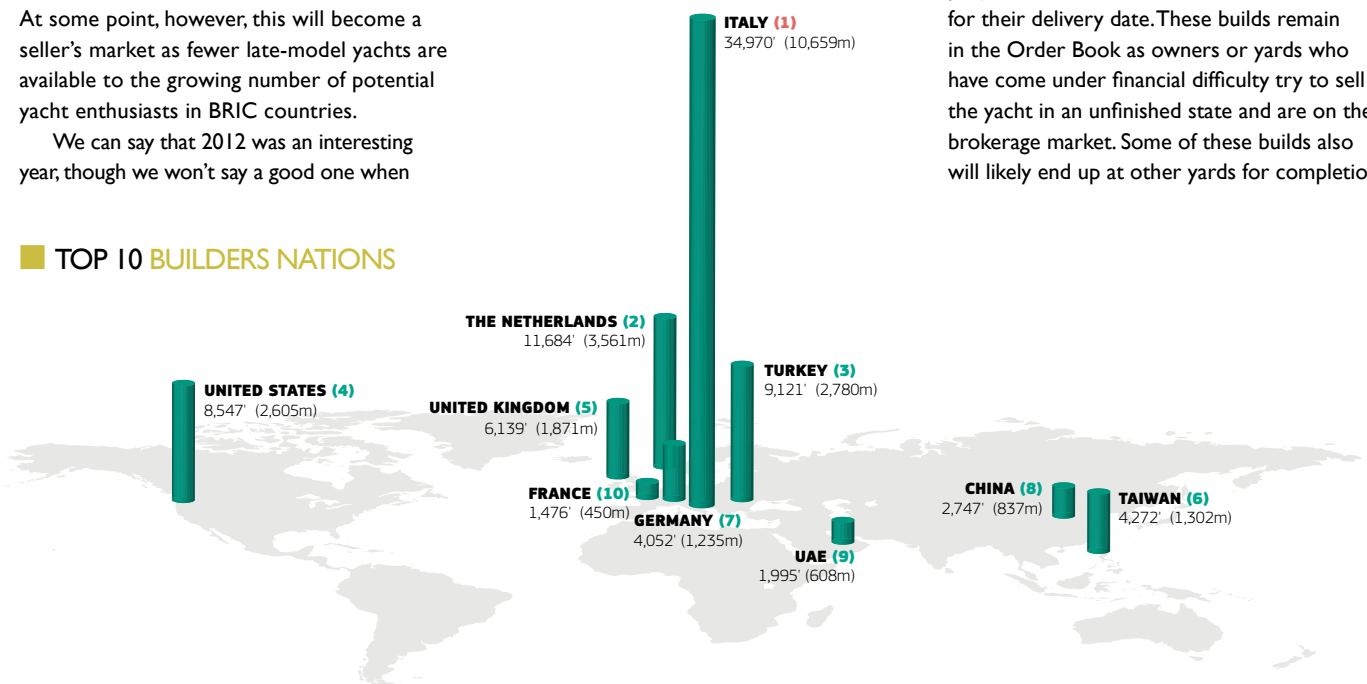

“ ALL BUILDERS SEEM TO BE FEELING PAIN IN THE 80- TO 90-FOOT RANGE ”

we compare the current figures to the past. Among builders that are considered industry staples, many of those who had relatively small numbers of orders at the beginning of the crisis in 2008 have continued to grow and have a strong showing. Many mid-range yards also report decent if not good activity, including Sunrise Yachts in Turkey with five yachts under construction including two 207-foot motor yachts scheduled for delivery in 2014. Although some who were considered staples, perhaps even authors of yachting history, have left or might leave this Order Book if a build is not signed soon. Some yards are operating despite the lack of an 80-foot-plus yacht in the shed by capturing commercial work.

In this year's tables you'll note many projects under construction listed as "on hold" for their delivery date. These builds remain in the Order Book as owners or yards who have come under financial difficulty try to sell the yacht in an unfinished state and are on the brokerage market. Some of these builds also will likely end up at other yards for completion

TOP 10 BUILDERS NATIONS

Willis is one of the most trusted names in Marine insurance, with unrivalled expertise in hull, liability and marine capabilities. By integrating the world's leading superyacht insurance specialists with the oldest marine insurance broker, Willis offers experience, ingenuity, best advice and unparalleled service to discerning superyacht owners.

We are proud that the owners of 10 of the world's largest 20 yachts and 24 of the largest 100 have already chosen Willis as their yacht insurance broker. Our yacht insurance specialists understand that a yacht is more than just a vessel, it is a passion.

Willis yacht insurance specialists are integrated with over 250 commercial marine insurance specialists to bring the best of both worlds to superyacht owners. The world's largest dedicated and most experienced marine team with over 70 insurance specialists complement the entire marine team by providing direct access to Lloyd's and London underwriters as well as those in continental Europe. No intermediaries are necessary and we are all Willis employed. When Lloyd's and/or London underwriters are used, a single-budget item for all income earned by Willis is transparent to you.

and are thus still part of the Order Book. As of press time, for example, the Viudes 45, which began life in Barcelona's Viudes Yachts a couple of years ago was just launched by the Italian yard Mondo Marine. Also, former hulls that were started at Chile's Marco Yachts have been sent to yards in New Zealand, the U.S. and The Netherlands for completion. Refit work has also become an important revenue stream for shipyards with many yards now having a specialized and dedicated refit

team, including the more prestigious yards such as Lürssen, Feadship and Royal Huisman. Marlow Marine, which also owns small boat lines Hunter and Mainship, has purchased the former Merrill Stevens Dry-Dock in Miami for an East Coast repair venue. With the global fleet becoming older, the demand for refit work will continue to grow going forward.

In 2011, the secondhand brokerage market had a banner year with 262 sales that included some very large yachts, such as the 377-foot *Pelorus*. At the end of September 2012, we had tallied 175 sales, a definite 33.2% drop from 2011. We hope to exceed 200 sales by the end of the year, but we will definitely not reach the numbers from 2011. Of note, total asking prices for secondhand yachts are below last year, as is the average length of yachts on the market. We can only assume that the fall in these numbers relates to the “wait and see” economic attitude in Europe.

All in all, there are some good points to the 2013 Global Order Book, some slightly darker, but we can stay optimistic for the future. Some exciting projects are in the pipeline and the market for new yachts over the 40-meter mark

“ WITH THE GLOBAL FLEET BECOMING OLDER, THE DEMAND FOR REFIT WORK WILL CONTINUE ”

has begun moving and will continue its rise. With the American market beginning to spend again and Asia, Brazil and Russia continuing their interest in spending their liquid assets in the yachting industry, we can expect to see a rise in the Global Order Book next year.

One last point, but an important one: for various reasons including new trends in hull shapes, the only absolute way to calculate the size of all yachts produced is by gross tonnage. This is also the best measure of man-hours of work involved and future crew requirements. Counting that way, the 2013 Order Book has the largest production since the beginning of the crisis, even if there are fewer projects listed.

ABOUT THE 2013 GLOBAL ORDER BOOK:

You will discover several hulls with a shipyard designated as “custom.” Most of these are currently under construction in one of the shipyards listed, but for diplomatic or contractual reasons, the yards would not confirm the build officially even if in discussions these projects are known to exist. We’ll give you more details about them as soon as possible.

“ THE ONLY ABSOLUTE WAY TO CALCULATE THE SIZE OF ALL YACHTS PRODUCED IS BY GROSS TONNAGE ”
